Hand Shower Components

Hand Shower

The spray head that brings flexibility and comfort to the shower. It can be held in hand for targeted rinsing or mounted for a traditional shower experience.

Hand Shower Hose

A durable, flexible connection between the water supply and the hand shower.

Waterway Elbow with Holder

Mounts to the wall to supply water and neatly cradle the hand shower when not in use.

Slide Bar or Shower Rail

Allows the hand shower to be adjusted in height and angle for multiple users.

Diverter

Lets you switch between the main showerhead and the hand shower, creating a versatile showering experience.

RRP (Rain Rail Plus)

An all-in-one system that integrates the slide bar, holder, and diverter for a simple, streamlined hand shower setup.

MOUNTAIN RE-VIVE™

Hand Showers

Mountain Plumbing's **hand showers bring comfort, convenience, and flexibility** to the bathroom. Designed to complement your main showerhead, they make everyday routines more versatile — from rinsing and cleaning to providing a spa-like experience in your home.

With a wide range of styles, finishes, and configurations, Mountain hand showers can be tailored to fit any bathroom design. Whether mounted on a rail for adjustable height or paired with the all-in-one Rain Rail Plus system, each setup combines **practical function with thoughtful design** details that elevate the shower as a whole.

MOUNTAIN PLUMBING

Rain Rail Plus

The Rain Rail Plus brings luxury and convenience to any bathroom remodel. **Designed with simplicity in mind, the Rain Rail Plus installs directly onto the existing single showerhead outlet**, eliminating the need for costly alterations to tile, plumbing behind the wall, or valve replacements. With just a straightforward surface-mount installation, your shower is instantly transformed into a customized dual outlet system.

Equipped with both an overhead rain shower and a versatile handshower, the Rain Rail Plus becomes **a spa-like experience without the need for a full renovation**. Offered in a variety of finishes, it blends modern design with practical installation, making it easy to upgrade both the look and performance of your shower.

Rain Rail Plus – Wall Mounted Shower Rail with Bottom Outlet Integral Waterway and Diverter

The Rain Rail Plus is the newest addition to the Mountain Re-Vive™ Shower Collection. The Rain Rail Plus is designed to make your bathroom remodel simple and effortless by avoiding unnecessary alterations to the tile, the plumbing behind the wall, or changing out the valve. Simply mount the Rain Rail Plus to the existing single showerhead outlet, and now your shower has transformed into a customized dual outlet showering experience equipped with rain head and handshower.

The Rain Rail Plus' adjustable slide rail bracket allows for easy height and angle adjustment to your handshower. Toggling between rain head and handshower functions is made easy with the diverter being located at the base of the rail.

- 3 Function Design (shower, handshower, or both on at the same time)
- Top water inlet to retrofit current shower setup
- Bottom diverter to switch from Showerhead to Handshower
- Brass Construction
- Handshower holder is adjustable in height and angle
- Swing Spout
- Mounting Hardware Included

- Handshower holder is adjustable in height and angle
- Mounting hardware included

Kits vs. Components

Individual Parts

Perfect if you're replacing or upgrading part of an existing installation.

Complete Kits

Best for remodels or new builds where having all components packaged together simplifies the process.

Schluter® Adaptors

When Needed

Required if you are using a Schluter® shower pan or waterproofing system. These adaptors ensure Mountain drains integrate securely and perform leak-free.

When Not Needed

Standard installations that do not use Schluter® products.

ABS vs. PVC Drain Bodies

ABS (Black)

Lightweight, slightly more rigid, and solvent-welded with one-step cement. Often preferred in colder climates because of its resistance to impact at lower temperatures.

PVC (White)

Strong, smooth-walled, and joined with primer + cement. More common in warmer climates and widely specified by plumbing codes across the U.S.A.

Which to Choose?

Most homeowners simply match the material already used in their home's plumbing system. Contractors may choose based on local code requirements, climate, or installer preference.

MOUNTAIN RE-VIVE™

Shower Drains

Mountain Plumbing shower drains combine performance with design flexibility for today's bathrooms. Offered in square, round, and tile-in styles, these drains are engineered for reliable water removal while adding a modern architectural detail to the shower floor.

With multiple cover designs, finish options, and compatibility with Schluter® adaptors, **Mountain drains can be tailored to suit any project – from new construction to remodels.** Whether you are selecting an individual drain, building a kit, or integrating with a tiled shower system, Mountain provides solutions that simplify installation and elevate the finished look.
